## Curriculum Model Roll-Out
Spring 2022-July 2024

Through the statewide roll-out of STREAMin³, UVA and VDOE are partnering to ensure **all publicly-funded birth-to-five educators** in Virginia can access high-quality curriculum. The partnership aims to:

1. Provide access to a low-to-no cost, comprehensive birth-through-preschool curriculum.

2. Deliver free professional development (PD) to help programs adopt and use the curriculum.

3. Develop sustainable resources so programs can use the curriculum and professional development resources beyond the initial rollout years at low-to-no cost.

Who, When, What?

Two initial groups of up to 2,000 classrooms (beginning March 2022) will receive:

- **All guides and activities** printed and delivered to their program at no cost. By summer 2024, STREAMin³ will launch a user-friendly online system to access the curriculum.

- **A set of high-quality children's books** to use with the curriculum activities delivered at no cost.

- **Professional development support.** These include smaller group training series, support from an Implementation Specialist, or, where it's needed most, direct coaching.

Priority for the initial groups will be given to classrooms:

- Currently participating in VQB5 and not using a VDOE approved curriculum option. (See list here.)

- In childcare centers or family day homes.

What if we don't meet the "priority" criteria?

We anticipate that all interested programs in VA will have access to this curriculum package as part of these groups. If these initial groups are full, interested programs will still receive virtual access to the curriculum, a list of books that the curriculum uses, a library of PD resources, and large training events (e.g., webinars). This virtual, open-access option will be available to any interested program by April 15, 2022.
